Nuclear Engineering and Design

CONTENTS OF ISSUE 177 (1–3)

Topical Issue

Seventh International Topical Meeting on Nuclear Reactor Thermal-Hydraulics

Guest Editor: Michael Z. Podowski

Preface
T.G. Theofanous 1
The impact of the Journal of Nuclear Engineering and Design on reactor thermal-hydraulics technology
R.T. Lahey, Jr 3
Foreword
M.Z. Podowski 5
Flooding of a large, passive, pressure-tube light water reactor
P. Hejzlar, N.E. Todreas and M. J. Driscoll 7
An investigation of transition boiling mechanisms of subcooled water under forced convective conditions
K.-W. Lee and S.-Y. Lee 25
A model for the performance of a vertical tube condenser in the presence of noncondensable gases
A. Dehbi and S. Guentay 41
An investigation of condensation from steam–gas mixtures flowing downward inside a vertical tube
S.Z. Kuhn, V.E. Schrock and P.F. Peterson 53
Free convective condensation in a vertical enclosure
R.J. Fox, P.F. Peterson, M.L. Corradini and A.P. Pernsteiner 71
An experimental investigation on penetration of buoyancy-driven cold liquid into a vertical channel with hot, forced-flow
J. Kobayashi, A. Tokuhiro, H. Kamide, H. Ohshima and Y. Ieda 91
A comparison of critical heat flux in tubes and bilaterally heated annuli
S. Doerffer, D.C. Groeneveld and S.C. Cheng 105
Rayleigh–Taylor instability of cylindrical jets with radial motion
X.M. Chen, V.E. Schrock and P.F. Peterson 121
Flow excursion time scales in the advanced neutron source reactor
C.D. Sulfredge 131
Analysis of steam generator loss-of-feedwater experiments with APROS and RELAP5/MOD3.1 computer codes
E. Virtanen, T. Haapalehto and J. Kouhia 147

PII S0029-5493(97)00316-6

Stability analysis of BWR nuclear-coupled thermal-hydraulics using a simple model
A.A. Karve, Rizwan uddin and J.J. Dorning 155
Modeling and numerical simulation of oscillatory two-phase flows, with application to boiling water nuclear reactors
M.Z. Podowski and M.P. Rosa 179
Analysis of the return to power scenario following a LBLOCA in a PWR
R. Macian, T.N. Tyler and J.H. Mahaffy 189
Numerical simulation of multi-dimensional two-phase flow based on flux vector splitting
H. Städtke, G. Franchello and B. Worth 199
CFD prediction of flow and phase distribution in fuel assemblies with spacers
H. Anglart, O. Nylund, N. Kurul and M.Z. Podowski 215
The low-power low-pressure flow resonance in a natural circulation cooled boiling water reactor
T.H.J.J. van der Hagen and A.J.C. Stekelenburg 229
Numerical boron mixing studies for Loviisa nuclear power plant
P. Gango 239
Boiling characteristics of dilute polymer solutions and implications for the suppression of vapor explosions
K.H. Bang, M.H. Kim and G.D. Jeun 255
The modeling of core melting and in-vessel corium relocation in the APRIL code
S.W. Kim, M.Z. Podowski, R.T. Lahey, Jr. and N. Kurul 265
The mixing of particle clouds plunging into water
S. Angelini, T.G. Theofanous and W.W. Yuen 285
On the constitutive description of the Microinteractions concept in steam explosions
X. Chen, W.W. Yuen and T.G. Theofanous 303
Experimental investigation of 150-kg-scale corium melt jet quenching in water
D. Magallon and H. Hohmann 321
FCI experiments in the corium/water system
I. Huhtiniemi, H. Hohmann and D. Magallon 339
Coupled calculation of the radiological release and the thermal-hydraulic behaviour of a 3-loop PWR after a SGTR by means of the code RELAP5
W. Van Hove, K. Van Laeken, L. Bartsoen, B. Centner and L. Vanhoenacker 351
